

MS-CIT Report

MS-CIT is a computer literacy course conducted by Maharashtra Knowledge Corporation Limited. The course covers computer basics, internet usage, MS Office, Google apps, cybersecurity, and digital skills. ([MKCL](#))

Standard MS-CIT Project Report

According to MS-CIT documentation guidelines, the report should include the following sections: ([Bosmina College](#))

1. **College / Institute Certificate**
2. **Preface**
3. **Acknowledgement**
4. **Table of Contents**
5. **Introduction**
 - Project Profile
 - Project Abstract
6. **System Analysis**
 - Requirement Analysis
 - Existing System
 - Proposed System
 - Feasibility Study
7. **Front-End Details**
8. **Back-End Details**
9. **Other Tools Used**
10. **Software Requirements & Specifications**
11. **Data Dictionary**
12. **E-R Diagram**
13. **Data Flow Diagram (DFD)**
14. **Screen Layouts / Screenshots**
15. **Conclusion**
16. **References**

MS-CIT Project Report

Title

Library Management System

1. Introduction

The Library Management System is developed to maintain records of books, students, book issue, and return activities digitally. The project helps reduce manual paperwork and improves efficiency.

Project Objectives

- Maintain book records
 - Issue and return books
 - Generate reports
 - Save time and effort
-

2. Requirement Analysis

Hardware Requirements

- Computer/Laptop
- 4 GB RAM
- 500 GB Hard Disk

Software Requirements

- Windows 10/11
 - MS Access / MySQL
 - Visual Studio / HTML
 - Internet Browser
-

3. Existing System

The current library system uses manual registers which:

- Takes more time
 - Causes data duplication
 - Difficult to search records
-

4. Proposed System

The proposed computerized system:

- Stores records digitally
- Provides quick searching
- Reduces paperwork
- Improves accuracy

5. Front-End

- HTML
- CSS
- JavaScript

6. Back-End

- MS Access / MySQL Database

7. Modules

Module	Description
Login	User authentication
Book Entry	Add new books
Student Record	Store student details
Issue Book	Book issue process
Return Book	Return process
Report	Generate reports

8. Data Flow Diagram

Level 0 DFD

User → System → Database

Level 1 DFD

- Login Process
- Book Management
- Issue/Return Process

9. E-R Diagram

Entities:

- Student
- Books
- Issue
- Return

Relationships:

- Student issues books
 - Books are returned by students
-

10. Screenshots

Include screenshots of:

- Login Page
 - Dashboard
 - Book Entry Form
 - Issue Book Form
 - Report Page
-

11. Conclusion

The Library Management System successfully manages library operations digitally and reduces manual work.
