

MS-CIT Project Report Sample

Title Page

PROJECT REPORT
ON
Library Management System

Submitted by:
Student Name: Larson Dsouza
Seat No.: -
Course: MS-CIT

Submitted to
Maharashtra Knowledge Corporation Limited

Academic Year: 2025–26

Certificate

This is to certify that Mr./Ms. Larson Dsouza has successfully completed the MS-CIT project titled “**Library Management System**” under my guidance.

Project Guide Signature: -
Date: / / 2026

Acknowledgement

I express my sincere thanks to my faculty members, institute staff, friends, and family members for their support and guidance during the completion of this MS-CIT project.

1. Introduction

Library Management System is a computerized system used to maintain records of books, students, book issue details, and return details. It helps to manage library activities efficiently and reduces paperwork.

MS-CIT includes practical project report preparation as part of digital literacy and office productivity skills. ([MS-CIT](#))

2. Objectives

- To maintain book records digitally
 - To issue and return books quickly
 - To reduce manual work
 - To generate reports easily
 - To improve data accuracy
-

3. Existing System

The traditional library system uses registers and manual entries. Problems include:

- Time consuming
 - Difficult record searching
 - Chances of errors
 - Data duplication
-

4. Proposed System

The proposed computerized system will:

- Store all records digitally
- Generate reports automatically

- Save time and effort
 - Improve security and accuracy
-

5. Hardware & Software Requirements

Hardware

- Computer/Laptop
- Printer
- Keyboard & Mouse

Software

- Windows Operating System
 - MS Word
 - MS Excel
 - MS Access
-

6. System Design

Input

- Book details
- Student details
- Issue/Return information

Process

- Record storage
- Search operation
- Report generation

Output

- Book availability report
 - Student report
 - Fine report
-

7. Advantages

- Easy data management
 - Fast searching
 - Less paperwork
 - Accurate reporting
 - User friendly
-

8. Limitations

- Requires computer knowledge
 - System failure may affect records
 - Requires electricity and backup
-

9. Future Scope

- Online library management
 - Barcode integration
 - SMS/email notifications
 - Cloud database support
-

10. Conclusion

The Library Management System helps in managing library records efficiently. It reduces manual work and increases accuracy. This project improves practical computer knowledge and office automation skills.
